

This **Ethernet over Copper Service Agreement** ("Service Agreement") sets forth the specific terms and conditions under which LightEdge Solutions, Inc. ("LightEdge") shall supply certain Services to Customer. The Master Service Agreement entered into between LightEdge and Customer fully incorporates the terms herein and provides that this Service Level Agreement, and Customer's execution of the Master Service Agreement constitutes acceptance of the terms and conditions stated herein. Capitalized terms used but not defined herein shall have the meanings set forth in the Master Service Agreement. The Initial Term length for this Service is set forth on the applicable Purchase Agreement, executed by LightEdge and Customer, making reference to this Service.

1.0 Terminology

1.1 Authorized Contact

Representative authorized by Customer to request service changes using procedure outlined herein.

1.2 Customer

Customer is party LightEdge is entering into Service agreement with.

1.3 Customer Premise

"Customer Premise" refers to the physical address (as stated in the Purchase Agreement) where the LightEdge has been requested to provide services.

1.4 Customer Network

"Customer Network" refers to the entire network Customer makes available to Remote Users as part of this Service. "Customer Network" may include many different physical locations and/or physical pieces of Equipment.

1.5 Equipment

"Equipment" refers to Equipment that LightEdge has deployed at Customer Premise to enable a service.

1.6 Service

"Service" refers to the Service and/or circuit used to connect "Customer Premise" to LightEdge Solutions' network. The use of "Service" in this document is specific to the Service outlined in this document. Use of the term "Service" in any other LightEdge documentation in no way supersedes the definitions of "Service" outlined herein.

2.0 Service Description

2.1 General

LightEdge will provide Customer with point-to-point network connectivity Service between the Customer Premise identified below and the LightEdge Internet Protocol ("IP") network. Service will be delivered in the form of a dedicated Ethernet over Copper circuit engineered by LightEdge which will be dependent upon location, bandwidth and/or Services requested.

Ethernet over Copper is symmetric data Service to the Customer's premises and is provided over multiple unbundled copper pairs at the Customer's premises. The downstream bandwidth (from LightEdge to the Customer) is equal to the upstream bandwidth (from the Customer to LightEdge). The Customer eligibility for Ethernet over Copper bandwidth depends upon the distance the Customer Premise is from the Central Office.

Additional unbundled copper pairs will be provisioned above the number required to provide Service. These additional unbundled copper pairs will be provisioned as standby pairs to protect the Service against an issue with any of the unbundled copper pairs that are in use.

2.2 Availability

The availability of Ethernet over Copper is dependent on distance from the nearest "Ethernet over Copper-capable" CLEC central office. Availability to Customer Premise is dependent on a pre-qualification cycle to be initiated by LightEdge. LightEdge reserves the right to limit availability of Service even if pre-qualification cycle determines Customer Premise to be Serviceable by Ethernet over Copper.

2.3 Bandwidth

Customer acknowledges that final speed of service will not be known until time of provisioning and additional copper lines may be needed to reach customers contracted speed. If service requires additional copper lines, customer agrees to amend contract appropriately. If service is deemed unfeasible to deliver due to lack of available copper, LightEdge reserves the right to deem contract for service null and void. The bandwidth available with this service is dependent on distance from the customer site to the nearest DSL capable Central Office, as well as, the quality of the circuit provided to LightEdge. Bandwidth available on service may decrease at any time during the duration of the service contract due to quality issues outside of LightEdge's control. LightEdge will make all efforts to return service to speed available during initial provisioning of service. . If at any point service is deemed unfeasible to deliver at original bandwidth LightEdge reserves the right to deem contract for service null and void. Service SLAs will not apply to service if root cause of outage is deemed to be related to the bandwidth available to the service that are due to changes made by the ILEC providing the copper to LightEdge.

3.0 Service Options

The following features may be included with Customer Service. Description of Service feature herein in no way entitles customer to feature. Features described below may have additional cost associated with them.

3.1 Config, Stage, and Ship

LightEdge offers Configuration, staging and shipping of Customer Equipment used to terminate Service. Configuration only includes configuration of Equipment to support LightEdge Service. LightEdge reserves the right to bill customer at current hourly rates for configuration requests that are not required to provide Service outlined herein.

Shipping of equipment includes standard ground shipping. LightEdge reserves the right to bill customer if any alternative shipping method is requested by Customer.

3.2 Equipment Management

LightEdge offers management of Customer Equipment used to terminate Service. Router management only includes configuration and management of Equipment necessary to support LightEdge Service. LightEdge reserves the right to bill customer at current hourly rates for configuration requests that are not required to provide Service outlined herein.

3.3 DNS

LightEdge operates "resolving" or "caching" DNS servers that Customer may use for domain name look-ups by Customer's in-house systems (PCs, mail servers, etc.) that are connected to Service. This domain name look-up Service is only available if LightEdge is providing primary DNS or primary and secondary DNS to Customer and if Customer does not have its own DNS server(s), and it may not be used by Customer's spam detection software for querying spam block lists.

Customers running their own DNS Servers or relying on third parties to host their domain names must use their own servers or the third party's DNS Servers for this purpose. These servers may not be configured to forward DNS queries to LightEdge's DNS Servers. Customers may not make more than 150 DNS queries per minute averaged over 30 minutes and/or more than 600 DNS queries per minute during any 5-minute interval.

LightEdge will provide reverse DNS at the request of Customer for all IP addresses statically routed to Customer as part of Service.

4.0 Service Delivery

4.1 General

It is Customer's responsibility to ensure that all devices at Customer Premise are able to connect to Equipment and are configured properly. This includes but is not limited to Ethernet switches, Ethernet cabling, workstations, servers and operating systems.

4.2 Installation

If additional configuration work is required due to limitations of the Customer Network LightEdge reserves the right to bill customer at current hourly rates for additional configuration time. LightEdge is NOT responsible for and will not be obligated to provide any support of or assistance in configuration, installation, administration, troubleshooting, maintenance, or repair of such customer equipment or integration of such customer equipment into Customer's internal network. LightEdge is NOT responsible for and will not be obligated to provide any support of or assistance in configuration, installation, administration, troubleshooting, maintenance, or repair of any software or network application or integration of such software or hardware application into the Customer Network.

4.3 Cabling

Service to Customer Premise will be delivered into the nearest telephone demarcation point of the Customer Premise. LightEdge will extend service from the telephone demarcation point to customer equipment up to 50ft. LightEdge will not extend wiring through existing walls or permanent ceiling. LightEdge will not extend wiring where the cable needs to be installed 12ft or higher (warehouse) above walking surface. LightEdge is not responsible for existing station cables within the customer premise. The customer is responsible for providing all patch cables from the CPE (router/switch) equipment to the in-house cabling infrastructure. LightEdge will provide a 3 foot patch cable from wall jacks to LightEdge managed VoIP equipment (Phones, Sipura)

LightEdge offers the following cabling options for service at additional charge as described in the Customer Service Agreement. Available install services at customer premise may include (a) pre-install walk through of customer's existing or new premises. (b) troubleshooting station cabling in customer premise.

LightEdge reserves the right to bill customer at current market rates for any cabling required to support service. LightEdge reserves the right to use outside cabling contractors to perform cabling work.

4.4 Service Upgrades

LightEdge may use other carrier networks and/or Equipment to provide Customer with equivalent Service. LightEdge reserves the right to replace Customer Service with equivalent or upgraded Service at any time during contract duration. LightEdge will make an effort to coordinate any such Service change with the Customer prior to such change. If LightEdge is unable to coordinate an acceptable time for a Service change with the Customer LightEdge reserves the right to make such a Service change during a scheduled maintenance window.

5.0 Equipment

5.1 Equipment Purchase

Customer can purchase Equipment outright or lease Equipment through LightEdge as set forth in the Customer's Master Service Agreement.

5.2 Equipment Requirements

LightEdge will define Equipment to be used with Service. LightEdge maintains a list of compatible Equipment and reserves the right to modify this list of compatible Equipment at any time.

LightEdge reserves the right to classify previously supported Equipment as "end of sale" or "end of life".

Equipment classified as "end-of-sale" will no longer be sold to a Customer even if Customer had previously purchased that specific Equipment. LightEdge will make every effort to continue to support Equipment classified as end-of-sale for as long as possible. LightEdge reserves the right to reclassify of end-of-sale Equipment as end-of-life at no less than six (6) months after such Equipment has been classified as end-of-sale Equipment.

Equipment classified as "end-of-life" will no longer be supported or sold by LightEdge. If Customer has Equipment that has been classified as end-of-life in Service LightEdge reserves the right to force Customer to upgrade to supported Equipment at Customer's expense in order to provide Service to Customer. LightEdge does not relinquish this right even if Equipment was sold to Customer by LightEdge.

5.3 Equipment Configuration

Customer is responsible for all Equipment configuration changes not specifically outlined herein. Customer is responsible for any Equipment modifications necessary at Customer Premise to accommodate Service outlined herein.

5.4 Equipment Failure

Unless Customer has contracted with LightEdge for Equipment warranty Customer is responsible for any failure of Equipment.

6.0 Service Support

6.1 Authorized Contacts

A customer contacting the LightEdge Technical Support Center to request an add, move, or change and/or to request information on their account, must utilize one of two methods to define "authorized contacts".

6.1.1 Contact List

Customer shall provide a "contact list" which may contain up to two (2) contacts per service authorized to request service changes or information, including the name, email address and phone number for each contact. Requests to change a contact on the list may be submitted by any of the authorized contacts. Requests to replace the entire customer contact list shall be submitted via fax to LightEdge on customer company letterhead including a new set of contacts including the name, email address and phone number for each new contact. All requests are verified per procedure below.

- Requests for configuration information or changes are accepted only from documented, authorized client-organization contacts via email, fax or phone.
- E-mail and fax requests are verified with a phone call to the documented client contact. Phone call requests must be validated with an email request from a documented client contact.

6.1.2 Codeword

Should a customer require more than two contacts, the customer shall provide a codeword used to request service changes or information. The customer must also specify an administrative contact that is authorized to change the codeword. Requests to change the administrative contact shall be submitted via fax to LightEdge on customer company letterhead including the name, email address and phone number of the new administrative contact. All requests are verified per procedure below.

- Clients utilizing the codeword option must submit requests for configuration information or changes via email or fax - without the codeword. Email requests that include the codeword will be denied and the client codeword administrator will be notified to change the codeword.
- The request will be verified with a phone call to the requestor who must then provide the codeword to validate the request.

6.2 Helpdesk

Customers must contact LightEdge Support to report service trouble or an outage with LightEdge Technical Support. LightEdge Technical Support will be available seven (7) days per week; twenty-four (24) hours per day; three hundred sixty-five days (365) days per year. LightEdge Technical Support provides support for network monitoring, trouble ticket resolution, and fault isolation up to the termination point of LightEdge provided Equipment.

LightEdge Technical Support will accept trouble and outage related support calls from any customer representative. Requests for service changes or information are accepted from any Authorized Customer Contact per conditions and procedures described above in Section 6.1. LightEdge will not perform any requested activity which may cause Service disruption unless initiated by an Authorized Customer Contact. LightEdge reserves the right to delay response on support tickets opened by anyone other than the Authorized Customer Contact.

LightEdge will not perform any requested activity which may cause Service disruption unless initiated by an authorized contact. LightEdge will not perform any changes to Service unless request is initiated by an authorized contact.

Communication between Customer and LightEdge not initiated by Authorized Customer Contact will not be subject to SLA remedies.

All communications with Customer will be in the English language.

6.3 Support Limitations

LightEdge Technical Support is not responsible for end-user support of issues not directly related to Service. This includes (but is not limited to) Customer operating systems, Customer equipment, or Customer application support.

6.4 Repair Time Commitment

LightEdge will make all reasonable efforts to resolve problems resulting from Customer initiated trouble tickets for this Service within eight (8) hours.

6.5 Monitoring

At Customer's request, LightEdge will provide basic monitoring of Service availability and utilization. Utilization reporting may require Simple Network Management Protocol ("SNMP") access to Equipment from a LightEdge designated IP subnet. Availability monitoring and reporting requires Internet Control Message Protocol ("ICMP") access to Equipment from a LightEdge designated IP subnet. LightEdge will provide e-mail (to pager) notification of Service availability issues. LightEdge will provide 24 x 7 response to Customer or NOC initiated alarms for Service availability issues. Service usage reports will be made available at <http://my.LightEdge.com>.

6.6 Notifications

If requested by Customer LightEdge will notify Customer within fifteen (15) minutes of a Service outage via e-mail (to pager) notification Services. LightEdge will monitor connections to the IP address of the customer router. An outage is defined as any fifteen (15) consecutive minutes where the connection is unavailable. If an outage is determined, LightEdge will generate an email notification to Customer. Customer is responsible for providing their own pager (s), a suitable email-pager gateway, and up to two (2) corresponding email addresses.

6.7 Maintenance

Maintenance window for disruptive work to service will be limited 12:00 A.M. to 4:00 A.M., local time, any day with requirement of two (2) business day notification to Customer prior to maintenance.

LightEdge will send an email notification of such disruptive maintenance to Service to Authorized Contacts of Customer. Once notification is sent to Customer this will be considered a "scheduled maintenance". Any Service SLAs will not apply during a scheduled maintenance.

LightEdge reserves the right to perform emergency Service or network maintenance as needed outside this window, in which case LightEdge will make a reasonable effort to notify the Customer if feasible under the circumstances. Any such maintenance will be considered an "emergency maintenance". All Service SLAs will apply during emergency maintenance.

Customer is responsible for maintaining and updating Authorized Contact list with LightEdge. LightEdge will not be held responsible for maintenance notifications missed due to out-of-date Authorized Contact information.

7.0 Billing

7.1 Service Activation Date

Billing for the Service Component will begin on the Service Activation Date, as specified below, for the specific Service type.

The Service Activation Date is the date (i) Equipment is installed and tested at the Customer's locations, and (ii) IP connectivity to LightEdge has been established.

7.2 Billing - Additional Charges and Fees

7.2.1 Field Technician Charge (FTC)

The FTC of the current rate is incurred for each dispatch of a Service tech. This fee is waived for Customers who select the Managed Equipment Option at that location. For this Service the Activation Fee includes one Service tech visit at the time of installation.

7.2.2 Missed Appointment Fee

Customer or its authorized representative must be available at the Customer location for the scheduled installation appointment date to grant the Service tech access or to accept delivery of the Equipment, or to work with installation technician to turn up the service. If no one is available, the Service tech will attempt to contact LightEdge and the Customer by phone for up to 15 minutes.

Re-scheduling such missed appointment will incur a Missed Appointment Fee at the current applicable rate.

7.2.3 Minimum Retention Period – Moves

In the event Customer terminates the Service before the expiration of the contracted period, due to a move, then Customer shall pay the termination charges in accordance with the Customer's Service Agreement. LightEdge will waive the termination charges, if Customer purchases another Service from LightEdge at a new location, which is of the same or greater value and subscribes to a new minimum contracted period of at least twelve (12) months. Additional Equipment charges may apply depending on the type of the new Service that is being purchased by Customer. If service is not available at new location, customer is subject to termination charges per the Master Service Agreement.

8.0 Customer Requirements

Customer shall be fully responsible for providing to LightEdge at Customer's own expense and in a timely manner the following:

- All security for its Services and systems used or accessible in connection with Service.
- Cooperative testing of all Customer-provided hardware, software, and Services for compatibility with Service.
- Designating an Authorized Contact(s) to be the point of contact to interface with LightEdge Technical Support.
- All cabling necessary to support Service
- Earth grounding available within 20 feet of Equipment used to terminate Service
- An Equipment room environmentally compliant with local laws and other environmental conditions as specified by LightEdge; reasonable access to the Equipment at times specified by LightEdge; adequate work space, heating/cooling, light, ventilation, and electrical outlets and for any Service which requires a telephone line, as detailed in the Service Guide,

Customer shall also make available to LightEdge for diagnostic purposes a local exchange carrier dedicated inbound telephone (POTS) line, which shall not be used by Customer for any other purpose while Service is being provided. Customer shall also arrange provide timely access to any rights of way, which LightEdge deems necessary to provide, maintain or remove the facilities required for any of the Services on all applicable premises without charge or cost to LightEdge. Equipment shall not be removed, relocated, modified, interfered with, or attached to non-LightEdge Equipment by Customer without prior written authorization from LightEdge.

Service will not be provisioned and if delivery of the local loop is delayed, then provisioning of Customer's Service will be delayed as well.

Customer understands that even after the Service circuit is provisioned and operational, certain conditions may impact the quality and use of the line. Environmental issues such as quality of the telephone line, interference from other Service connections, high frequency sources close to the telephone line, etc. may deteriorate the quality or speed of the Service circuit resulting in reduced throughput. LightEdge will undertake reasonable effort to restore the original quality or speed, but restoration is not guaranteed and the Service may be deemed technically not feasible. If the Service circuit is deemed technically not feasible, the Customer will be asked to disconnect the circuit at no cost or without penalty. If the Customer chooses to continue to use the circuit, after it is deemed technically not feasible, Customer understands that the line will not be supported by LightEdge from a maintenance perspective.

Customer acknowledges that in the event of a trouble, Customer is responsible for on-site cooperative testing with LightEdge Technical Support to assist in the diagnosis of the trouble, including the cost of a 3rd party vendor if customer does not have internal resources available.

Customer agrees to be bound to current terms of LightEdge Acceptable Use Policy. Terms of the Acceptable Use Policy are subject to change without notice. Customer agrees to be bound to any and all versions of LightEdge Acceptable Use Policy. Current Acceptable Use Policy can be found here.

<http://www.LightEdge.com/legal>

9.0 Service Conditions

Customer acknowledges and understands that dedicated network connections, unless protected by an Internet security product or Service, may significantly decrease Customers overall network security level and performance. To the extent Customer deems necessary, Customer will implement security procedures and controls necessary to limit access to the Service.

Customer will maintain facilities and procedures external to the Service for reconstruction of lost or altered files, data or programs.

Customer understands that LightEdge will make commercially reasonable efforts to provision Service. However, provisioning of Service is contingent upon the availability of Service capable local loops to Customer's location being made available to LightEdge. If no such Service-capable local loop is available to LightEdge, then

10.0 Service Level Agreements

10.1 General

LightEdge will be the sole party to determine whether LightEdge has not met any of the Service level agreements specified herein. LightEdge reserves the right to change or discontinue any or all of the Service level agreements detailed below at any time without notice to the Customer. Customer must at all times cooperate with LightEdge in testing, determining and verifying that a qualifying Service outage has occurred.

10.2 SLA Credit Request Process and Limitations

In order to receive any of the SLA credits (specified herein) for Service, an Authorized Contact must immediately notify LightEdge Technical Support of an occurrence within the LightEdge Service that results in the inability of the Customer to transmit IP packets within the LightEdge Service ("Service Outage"). A Service Outage does not include an outage that occurs during scheduled periods of maintenance or upgrades.

LightEdge Technical Support will investigate the reported outage and assign a Trouble Ticket number. Once LightEdge determines that the substantiated Service Outage that could qualify Customer for the SLA credit occurred ("Verifiable Trouble Ticket"), then Customer may request a Service Credit within 30 days after the event giving rise to the credit by contacting LightEdge Technical Support and asking for an SLA credit escalation. A Verifiable Trouble Ticket must accompany Customer's request for any SLA credit regarding the Service purchased by Customer. Credits should appear on Customer's bill for the Service within two (2) billing cycles, after such SLA credit has been approved by the LightEdge representative.

In any calendar year, Customer's aggregated SLA credits may not exceed, for any Service, three (3) month's worth of the monthly Service fee for the affected Service.

In any billing month SLA credits may not exceed, for any Service, fifty (50) percent of the monthly Service fee for the affected Service.

For purpose of calculating SLA credits, this monthly Service fee shall mean the monthly recurring charge for such line, but excluding, in all cases, (i) any monthly recurring fees for the Service features (e.g., domain name hosting or email Service), (ii) all one-time charges; and (iii) at all times excluding the monthly recurring charge attributable to Equipment for such line.

Credits are exclusive of any applicable taxes charged to the Customer or collected by LightEdge.

10.3 SLA Exclusions

SLAs do not apply and LightEdge is not responsible for failure to meet an SLA resulting from:

- misconduct of Customer or Users of Service
- Failure or deficient performance of power, Equipment, Services or systems not provided by LightEdge
- Delay caused or requested by Customer
- Service interruptions, deficiencies, degradations or delays due to any access lines (i.e. POTS line) whether provided by LightEdge or by third parties, or Equipment when provided by third parties.
- Service interruptions, deficiencies, degradations or delays during any period in which LightEdge or its representatives are not afforded access to the premises where access lines associated with Service are terminated or LightEdge Equipment is located
- Service interruptions, deficiencies, degradations or delays during any period when a Service Component is removed from Service for maintenance, replacement, or rearrangement purposes or for the implementation of a Customer order
- Customer's election to not release a Service Component for testing and/or repair and to continue using the Service Component

- Force Majeure conditions such as fire, explosion, lightning, power surges or failures, strikes or labor disputes, water, acts of god, the elements, war, civil disturbances, terror, acts of civil or military authorities, fuel or energy shortages, acts or omissions of suppliers or other causes beyond LightEdge's control, whether or not similar to the foregoing.
- Service interruptions, deficiencies, degradations or delays during any period when a Service Component is removed from Service for maintenance, replacement, or rearrangement purposes by Customer staff.
- Failure to provide suitable secure environment for on premise devices including but not limited to: secure mounting/racking, appropriate cooling and air handling, secure from theft, loose wires bundled neatly, etc.
- Service interruptions, deficiencies, degradations or delays in Service caused by any piece of equipment, configuration or technology under the management or control of the Customer.

In addition, Service SLAs do not apply (a) if Customer is entitled to other available credits, compensation or remedies under Customer's Service Agreement for the same Service interruption, deficiency, degradation or delay, (b) for Service interruptions, deficiencies, degradations or delays not reported by Customer to LightEdge, (c) where Customer reports an SLA failure, but LightEdge does not find any SLA failure, and (d) when Service is dependent upon other Service with lower SLA.

If Customer elects to use another provider or method to restore Service during the period of interruption, Customer must pay the charges for the alternative Service used.

10.4 SLA Classifications

10.4.1 Availability

"Availability" SLAs apply only when service is completely unavailable due to any sort of issue. After Customer opens a ticket on Service issue LightEdge Technical Support will classify the issue. If LightEdge Technical Support determines that Customer service is 100% unavailable the issue will be categorized as a "Service Availability" issue and all SLA remedies applicable to Service Availability will apply. Any SLA remedies not specifically defined as "Service Availability" SLAs will not apply to same "Service Availability" issue.

10.4.2 Performance

Performance SLAs apply if Service is available in a degraded state. After Customer opens a ticket on Service issue LightEdge Technical Support will classify the issue. If LightEdge Technical Support determines that Customer service is available albeit with performance degradation the issue will be categorized as a "Service Performance" issue and all SLA remedies applicable to Service Performance will apply. Any SLA remedies not specifically defined as "Service Performance" SLAs will not apply to same Service issue.

Service Performance SLA credits will not be given if Service Availability SLA credits are requested against same Customer issue.

10.4.3 Other

"Other" SLAs apply whenever SLA goal has not been met. "Other" SLA credits will qualify for consideration even when "Service Availability" or "Service Performance" SLA credits are requested against the same Customer issue.

10.5 Availability SLA Goals

10.5.1 Availability SLA

For purpose of the Availability SLA, the duration of a Service Outage shall be deemed to commence upon the opening of a Verifiable Trouble Ticket by LightEdge Technical Support, in response to the Customer request, and ends when the Service Outage ends.

Trouble tickets, where the Service Outage cannot be verified with LightEdge's standard diagnostic procedures, do not count towards the Availability SLA.

Goal	Remedy
99.99% availability ~ 4.32 minutes downtime monthly	Each hour service is unavailable above SLA goal qualifies the Customer for a credit of 5% of MRC up to a maximum of 50% of MRR for affected service.

10.5.2 Service Repair Objective

For purpose of the Repair Objective, the duration of a Service Outage shall be deemed to commence upon the determination by LightEdge Technical Support that Service Repair is necessary and ends when the Service Repair has been completed. The Service Repair Objective is 8 hours.

10.6 Performance SLA Goals

10.6.1 Latency SLA

The Latency SLA is based on the speed at which packets are able to traverse the Service. If packets are completely unable to traverse Service (packet delivery is 0%) "Availability" SLA shall take precedence over "Latency" SLA. Credits from missing both SLA goals during the same outage event will not be issued.

Latency SLA does not apply if Service is degraded due to Customer activity. Measurement of packet delivery shall be taken based on circuit with no other data being passed on circuit. Latency must be verified by LightEdge at time of event to qualify Latency SLA credit. Latency values are measured only from Customer Network to nearest LightEdge network point. Latency values in excess of the SLA goal past the termination point of the circuit will not count towards latency measurements.

Sporadic occurrences of the issue due to the same root cause shall not be considered separate events when attempting to qualify for SLA credit.

Goal	Remedy
< 50msecs	51msecs – 100msecs for latency qualifies Customer for a credit of 3% of MRC per event > 101msecs for latency qualifies Customer for a credit of 5% of MRC per event

10.6.2 Packet Delivery SLA

The Packet Delivery SLA is based on the percentage of packets that are able to traverse the Service. If packets are completely unable to traverse Service (packet delivery is 0%) "Service Availability" SLA shall take precedence over "Service Packet Delivery" SLA. Credits from missing both SLA goals during the same outage event will not be issued.

Packet Delivery SLA does not apply if Service is degraded due to Customer activity. Measurement of packet delivery shall be taken based on circuit with no other data being passed on circuit. Packet delivery must be verified by LightEdge at time of event to qualify for Service Packet Delivery SLA credit.

Event shall be considered to begin when Customer contacts LightEdge Technical Support and Service issue is verified by LightEdge Technical Support. Event shall be considered to end when LightEdge Technical Support deems the root cause of the issue to be remedied ends or when LightEdge deems repair to be necessary. If LightEdge deems repair to be necessary to resolve Service Outage then Service Packet Delivery SLA shall cease to apply for duration of Service Outage.

Sporadic occurrences of the issue due to the same root cause shall not be considered separate events when attempting to qualify for SLA credit.

Goal	Remedy
100%	90-99% packet delivery qualifies Customer for a credit of 1% of MRC per event 50-89% packet delivery qualifies Customer for a credit of 3% of MRC per event 1-49% packet delivery qualifies Customer for a credit of 5% of MRC per event

10.6.3 Service Jitter SLA

There is no Jitter SLA with this Service.

10.7 Other SLA Goals

10.7.1 Monitoring SLA

The Monitoring SLA goal is measured from the time an outage is detected by LightEdge monitoring systems until such outage is reported to customer by the LightEdge automated notification system. The goal is considered met once the LightEdge monitoring system sends a notification to the customer. Receipt of the notification by the customer or lack of receipt will not be considered to be part of SLA goal.

Goal	Remedy
15 minutes	Each failure to meet the goal qualifies Customer for a credit of 1% of MRC per event

10.7.2 Backbone Latency SLA

There is no Backbone Latency SLA with this Service.

10.7.3 Backbone Packet Delivery SLA

There is no Backbone Packet Delivery SLA with this Service.
