E-mail Hosting

Receipt and delivery of e-mail is integral to the success of your business. Managed e-mail solutions from LightEdge offer a complete managed e-mail hosting platform designed to provide optimized messaging solutions for businesses. Partnering with LightEdge for your e-mail hosting can eliminate the resource drain of internal development and maintenance of an e-mail platform, while providing you with robust features, reduced operating costs, expert service and technical support and increased e-mail reliability.

Managed E-mail Solution

- More cost effective than in-house solutions with no hardware investment, licensing, maintenance or internal IT support required
- Free up internal IT staff to focus on core development
- Benefit from industry-leading service level agreements with less downtime and less maintenance
- Simplified administration via Web-based portal makes adds, changes and deletions of e-mail accounts an intuitive, non-technical function
- Clustered, redundant, carrier-grade platform for unlimited scalability
- LightEdge support for easy migration to your new e-mail solution, ensuring a smooth transition for administrators and users

Award-winning Protection

PC Magazine Editors' Choice Award-winning Postini spam filtering with 98% or better accuracy in blocking spam for a typical user.

Basic E-mail Hosting Complete Hosted E-mail Solution

Standards-based POP3/Webmail/SMTTP eliminates the need to host, license and maintain an internal e-mail server. LightEdge managed e-mail solutions work with standard e-mail software such as Microsoft® Outlook®, Microsoft Outlook Express, and Eudora®.

Anytime, Anywhere Access

All LightEdge managed e-mail accounts include a Web-based e-mail client, accessible from any Internet-connected Web browser. The Webmail client includes sophisticated features such as foldering, signatures, address books and more.

Delivery Flexibility

Administrators can set up e-mail aliases to allow end users to receive e-mail at multiple addresses. With this functionality, you can automatically forward e-mail sent to multiple addresses to a single user, or forward e-mail sent to one address to a list of users.

Simple Administration

With managed e-mail solutions from LightEdge, you gain access to our customer portal, which allows you to add, edit and delete accounts in real time.

Easy Migration, Experienced Support

Migration to your new e-mail solution from LightEdge is a simple and smooth process. The staff is experienced in the e-mail migration process, and will work to ensure that the transition is smooth for administrators and users. And, should you have any questions, our knowledgeable staff is available to help you solve issues or answer questions.

Optional Spam and Virus Filtering

LightEdge partners with Postini®, winner of PC Magazine® Editors' Choice Award, to provide user-friendly, flexible spam and virus filtering. The advanced heuristics-based services utilize a Web-based message center quarantine area to prevent spam or viruses from reaching user inboxes. Other features include category-based spam filtering, user-defined approved and blocked sender lists for customization, and near zero-latency for e-mail processing.
