

Your Goals. Our Network. Business-over-IP

Hosted Microsoft Exchange

Why Choose a Hosted Solution

With LightEdge Hosted Exchange, the economies of scale are on your side regardless of your business size. Hosted Exchange is offered as a monthly Scale-on-Demand service from our enterprise-grade data center, which makes it cost effective and highly scalable. Because Exchange is hosted and managed by LightEdge Solutions, there is no infrastructure to purchase and no footprint in your office.

Productivity

With Hosted Microsoft Exchange, the features of Microsoft Outlook suddenly come to life and impact your business' ability to effectively communicate and collaborate.

Meetings/Events

Exchange enables meeting organizers to review schedules for availability prior to setting up meetings, and therefore minimizing conflict. Reminders can be set to prompt participants, so meetings consistently begin on time.

Tasks

Shared task lists not only keep employees productive, but also allow supervisors to review the progress of each employee and delegate additional responsibilities.

Public Folders

Microsoft Exchange Public Folders can be used as a mini-Intranet. Public Folders allow specified users to post files that can be accessed by users based on their system rights.

Active Directory

Create and maintain a single global contact list that can be utilized by all users of the system.

Anytime/Anywhere Availability

Using the Microsoft Outlook Web Access (OWA), users can securely access e-mail, personal calendars, group scheduling and collaborative applications from any Web browser. With an intuitive interface similar to Outlook, users remain connected and productive while working remotely. This level of accessibility is crucial for employees traveling or telecommuting, and offers an additional level of risk management for disaster recovery situations.

Scalability

LightEdge's Scale-on-Demand availability means that you pay based on the number of users that you require, rather than over investing in an under-utilized server. The LightEdge infrastructure is in place for immediate implementation and allows new users to be added as your company grows.

Security

LightEdge Hosted Exchange includes state-of-the-art virus filtering to keep e-mail borne viruses out of user inboxes. Postini® spam filtering is offered as an optional addition to Outlook's existing Junkmail filtering. Postini has consistently been the market leader in anti-spam, with a catch rate of 94% and fewer false-positives than similar systems.

Hosted Exchanged Overview

- All the benefits of Microsoft Exchange without the cost and implementation
- Communication and collaboration enhancement for your business
- Secure Web access for remote productivity and disaster recovery
- Scale-on-Demand system grows with your business
