Server Hosting

Complete Outsourced Hosting

Housed in the LightEdge carrier-class facility Superior customer service with quick response times and access to data hosting experts Industry-leading SLAs and 24/7/365 monitoring and response

Flexible server access options and support for industry-standard remote management tools

Customized Solutions For:

- Data-driven Web sites
- Mail servers
- Business application servers
- CRM & ERP applications
- Databases
- E-commerce
- Extranets
- Off-site storage
- Disaster recovery

Additional Services

LightEdge provides the following optional services for dedicated and collocated hosting customers:

Managed Load Balancing

Dynamically determines which one of an array of servers configured with the same content can best handle an incoming request, then routes each request to the appropriate server for an optimized end-user experience

Managed Firewall

Acts as a filter between your server and the Internet to protect your server from malicious Internet traffic

Managed VLAN

Creates a Virtual Local Area Network to enable secure communication across multiple hosted servers

Managed Tape Backup

Prevent the loss of critical data from a malicious attack or hardware failure

Monitoring and Management

Web-based, real-time bandwidth monitoring with reboot capability and remote hands service via Web interface

Maximize Server Uptime

Access to Web, database and application servers is mission critical, and your business needs a solution that provides aggressive uptime guarantees, specialized client service and flexible options. Choose LightEdge as your partner for Web, database and application server hosting, and benefit from our specialized team of experts working to ensure safe, secure, optimized server performance. With an industry-leading service level agreement (SLA) LightEdge monitors and responds to server issues 24/7/365, enabling you to focus on your core business.

Flexible Options

LightEdge offers flexible service options and add-on features to meet a variety of business needs. No matter which option you choose for your business, you benefit from LightEdge Solutions' carrier-class hosting facility as well as our knowledgeable staff that is committed to delivering optimum performance for your chosen Hosting Service solution.

Virtual Hosting: Shared Equipment and Facilities for a Cost-effective Solution

Shared hosting from LightEdge gives you access to high-performance hardware, reliable bandwidth and a secure environment for a low monthly fee. This is a logical choice for simple Web site hosting, where you provide and maintain content, and LightEdge handles the server, bandwidth and management. For dynamic Web sites, you can add access to a shared database server for an additional fee.

Collocated Hosting: Your Equipment, Our Facilities

Collocated hosting allows you to place your equipment in our facility, and retain responsibility for its maintenance, content and applications. LightEdge provides a secure, environmentally-controlled data center and carrier-class facilities with clean power and dedicated, redundant network connectivity.

Dedicated Hosting: Our Equipment, Our Facilities

Dedicated hosting offers you a complete solution, with LightEdge providing servers, hosting space and carrier-class facilities. This service provides a business-class server with a base operating system and remote access software that enables you to manage your content and applications and remotely access your dedicated server. LightEdge provides base configuration, monitoring and maintenance of the server and hosting environment, and an entire menu of hardware and additional service features.
