

LightEdge Audio Conferencing Touch Tone Commands

- *0 Request Operator** Will bring the live operator into the conference. This works for both the Chairperson and participants.
- *6 Mute Line** Allows the Chairperson and/or participants to mute one's own line. Pressing *6 again un-mutes one's line and this will work when in Lecture Mode. So for a large call, questions & answers maybe handled with participants muting and un-muting their lines event if *5 (lecture mode) has been initiated by the Chairperson.
- *1 Dial-Out to Participant** Gives the Chairperson a dial tone and allows him to dial out to a participant
- *2** Brings the Chairperson and the participant into the conference
- *3** Disconnects the participant line (if unavailable) and brings the Chairperson back into the call
- *5 Lecture Mode** Allows a Chairperson to place all participants into listen mode
*(Pressing *5 again returns all participants to normal mode)*
- *7 Lock Conference** Allows a Chairperson to lock call from other participants attempting to enter
*(Pressing *7 again un-locks the conference)*
- *8 Roll Call** Provides the Chairperson the participant names (recorded when they entered the call)
- *9 Participant Count** Provides the number of participants on the call to the Chairperson
- ## Conference Continuation** By default, participants can continue talking after the Chairperson leaves the call (Conf. Continuation is ON). To turn OFF Conference Continuation, the Chairperson needs to press ## anytime during the call. When Conference Continuation is OFF, all participants are disconnected when the Chairperson hangs up.
