AN EXPERT

CLOUD FLEXIBILITY AND REDUNDANCY FOR YOUR IBM I PLATFORM

With LightEdge's Power Cloud offering, we prioritize your peace of mind and business continuity. We've crafted specialized solutions that not only ensure the stability of your IBM i (AS/400, iSeries) and AIX environment but also support its evolution. Our approach empowers you to experience all the benefits of your secure and reliable IBM i (AS/400, iSeries) platform while seamlessly integrating the flexibility and redundancy of the cloud.

In today's business landscape, the IBM i (AS/400, iSeries) remains a critical component of many organizations' core systems. However, its legacy nature poses challenges for in-house maintenance. As the demand for next-generation operating systems, applications, and integration grows, finding the right balance between the old and new is crucial.

HOW DOES THIS BENEFIT MY BUSINESS?

APPLICATION MODERNIZATION

Enhance efficiency and competitiveness through updated and scalable software solutions.

PLATFORM UPGRADES

IBM i Cloud enables businesses to stay technologically relevant and maintain optimal performance.
